Patent

Amendments to the Abstract:

A method ~~and product~~ of for semi-solid metal casting without the need for retrofitting of conventional casting equipment is provided. ~~A method of direct feed casting of semi-solid metals is also provided.~~ A semi solid method is used with a vertical indexing casting machine in which an indexing time can be used as the time to allow the metal that is heated to one temperature to cool to a second temperature before casting. The resulting product from the semi-solid metal casting method with the vertical indexing casting machine is also provided.
